The use of the DOT symbol molded into or onto a tire constitutes a certification by the manufacturer that the tire meets the applicable Federal safety standards. While it is not required that tires be tested prior to using the DOT symbol, the National Highway Traffic Safety Administration does maintain a compliance test program to enforce safety standards, and any tires that are found to be not in compliance with the Federal standards are subject to civil penalties of up to \$5,000 per tire but not to exceed \$15,000,000 for any related series of violations.

The tire manufacturer's identification code mark is required on all new pneumatic tires sold in the United States for highway use. The requirements for the code mark and other tire identification labeling are specified in Regulation Part 574 and the tire standards.

Should you no longer need a tire ID code mark or if any one of the following events occur, please notify us immediately, including the date of the change and the month, day and year the last tires were produced using the codes in question, so that our records can be updated:

1. There is a change in company or plant name or address.

3. The company or plant is sold or merges with another company.
4. The types of tires (e.g., passenger car, truck, bus or motorcycle) manufactured at each plant changes.
